

## the need for tranquility liviana wilson

the world is changing  
time to take a risk

reliance on the outside  
leading to failure  
economy crashes  
bank account slashes

families in late spring  
struggling through the cough  
united by the tragedy  
a straw house blown down

communities in sync  
the world slowing down  
kin owned businesses  
trying so desperately not to drown

a sullen wind  
a separating glance  
one sentence is all it takes

united by devastation  
united in truth  
united in love

alone in vicissitudes of fortune  
without community  
without relations

together in the now
