

Resilient Cities for Tomorrow's Climate

Beneath the climate's shifting gaze
Cities rise, a tapestry of days
In sustainable threads we weave
Resilience, our guiding belief

Sunlight dances, a warm embrace
Wind whispers through towering grace
Green oases, life's purest form
In cities, nature takes its norm

Transport's green, pollution's farewell
Recycle, reuse, nature's swell
Green structures, nature's embrace
In harmony, life's sweet grace

City's plan, nature's hand in play
Ecosystems thrive, day by day
Rise, act now, for future's sake
Resilience, future's make

Let's build cities of strength and might
Where nature and man live in unity's light
Sustainable, beautiful, a beacon so bright
Guiding us towards a future that's right
